Back-End Development: Node.js, Express, Prisma
Database: PostgreSQL, MongoDB, Supabase
Libraries/Dependencies: bcrypt, Bootstrap, Clerk, jQuery, Tailwind CSS
Tools: Git, GitHub, Figma

PROJECTS

RESTAURANT POINT OF SALE | https://point-of-sale-app-dc.vercel.app/

The project provides web application designed to streamline order management in a restaurant environment. The system features a responsive menu display, dynamic order creation and adjustment, real-time payment processing, and receipt generation.

- Front-End: HTML5
- Back-End: Node.js, Express
- Styling: Bootstrap
- Database: MongoDB
- Version Control: Github

SHIFT EASE | https://shift-ease-app.vercel.app/

Shift Ease is a comprehensive web application designed to streamline employee shift scheduling and management for small to medium-sized organizations. The platform supports role-based access for Admins, Managers, and Employees by enabling organization creation, employee record management, pending request processing, dynamic availability input, and scheduling.

- Front-End: React (with TypeScript)
- Back-End: Node.js, Express, Prisma
- Styling: Tailwind CSS
- Database: Supabase(PostgreSQL)
- Libraries/Dependencies: Clerk
- Version Control: Github
